WirelessKeyView v1.00
 Copyright (c) 2006 Nir Sofer
 Web Site: <http://www.nirsoft.net>

Description

WirelessKeyView recovers all wireless network keys (WEP/WPA) stored in your computer by the 'Wireless Zero Configuration' service of Windows XP. It allows you to easily save all keys to text/html/xml file, or copy a single key to the clipboard.

License

This utility is released as freeware. You are allowed to freely distribute this utility via floppy disk, CD-ROM, Internet, or in any other way, as long as you don't charge anything for this. If you distribute this utility, you must include all files in the distribution package, without any modification !

Disclaimer

The software is provided "AS IS" without any warranty, either expressed or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose. The author will not be liable for any special, incidental, consequential or indirect damages due to loss of data or any other reason.

System Requirement

- Windows XP with SP1 or greater.
- You must login to windows with admin user.

Using WirelessKeyView

WirelessKeyView doesn't require any installation process or additional DLL files. Just copy the executable file (WirelessKeyView.exe) to any folder you like, and run it.

After you run it, the main window should displayed all WEP/WPA keys stored in your computer by Windows 'Wireless Zero Configuration' service. For WEP keys, the key is also displayed in Ascii form. Be aware that this utility can only reveal the network keys stored by Windows operating system. It cannot recover network keys stored by any other third-party software.

Command-Line Options

/stext <Filename>	Save the list of all wireless keys into a regular text file.
/stab <Filename>	Save the list of all wireless keys into a tab-delimited text file.
/stabular <Filename>	Save the list of all wireless keys into a tabular text file.
/shtml <Filename>	Save the list of all wireless keys into HTML file (Horizontal).
/sverhtml <Filename>	Save the list of all wireless keys into HTML file (Vertical).
/sxml <Filename>	Save the list of all wireless keys to XML file.

Translating WirelessKeyView to other languages

In order to translate WirelessKeyView to other language, follow the instructions below:

1. Run WirelessKeyView with /savelangfile parameter:
WirelessKeyView.exe /savelangfile
A file named WirelessKeyView_Ing.ini will be created in the folder of WirelessKeyView utility.
2. Open the created language file in Notepad or in any other text editor.
3. Translate all string entries to the desired language. Optionally, you can also add your name and/or a link to your Web site. (TranslatorName and TranslatorURL values) If you add this information, it'll be used in the 'About' window.
4. After you finish the translation, Run WirelessKeyView, and all translated strings will be loaded from the language file.
If you want to run WirelessKeyView without the translation, simply rename the language file, or move it to another folder.

Feedback

If you have any problem, suggestion, comment, or you found a bug in my utility, you can send a message to nirsofer@yahoo.com

[Download WirelessKeyView](#)

WirelessKeyView is also available in other languages. In order to change the language of WirelessKeyView, download the appropriate language zip file, extract the 'WirelessKeyView_lng.ini', and put it in the same folder that you installed WirelessKeyView utility.
